## Future collaboration in research programming on industrial safety

Carita Aschan, Finnish Institute of Occupational Health  
SAF€RA Symposium 10 Feb 2015

# Our vision for the future

Safety and innovation jointly contribute to the competitiveness and sustainability of European industry, meeting societal challenges

Researchers from various scientific disciplines and stakeholders constitute a community, sharing knowledge about industrial safety

# And our mission to achieve it

SAF€RA shall **coordinate research investment** in Europe on industrial safety, improving the coherence of research, thus contributing to the development of the European Research Area.

SAF€RA will therefore:

- encourage cooperation between researchers from various countries and scientific disciplines;
- create new perspectives and opportunities for safety research to provide industry with forward-looking solutions;
- share emerging societal concerns, knowledge and research results on industrial safety issues in Europe;
- promote research on industrial safety as a competitive advantage and contribute to societal decision making on innovative technologies.

# The story continues...

# SAF€RA Partnership

- Aims to improve coordination of research investment on industrial safety, improving the complementarity of research undertaken in different member states
- Focuses on research programming and launching joint calls for proposals funded by the members of SAF€RA

# SAF€RA Partnership

- SAF€RA Partnership will become the core group for the joint programming activities in context of ETPIS, cooperating with other stakeholders
- Regional, national and European research institutions, research organizations and funding bodies such as foundations, national and regional agencies and ministries may apply for membership
- As the ERA-NET criteria does no longer apply, the participation of industry organizations are especially welcomed in order to improve the applicability of research projects and their outcomes in industry
- Contribute your ideas concerning topics for future SAF€RA calls by answering the survey

# At your service in the future
